

5. Why do we want to displace two-thirds of our department for one third.
6. Firefighters on our department with a spouse on another department could mess up their days off together with a shift rotation.

As for my opinion/feedback, it was hard to discuss this issued with any absolutes because the logistics of this "shift rotation was unclear". When would it be done, which shift goes where, how are r days and vacation picks affected, does this affect FLSA., overtime, work week, etc. My most pressing question is, How many "B" shift personnel really want this change? Also, are those personnel on the bottom of the seniority list?

Although I am neutral on this issue and will support your decision either way, I recommend that we do not participate in a "shift rotation" program due to the majority amount of negative feedback that I received from the troops.
